

# Skytree Secret Tour ?

Boasting a height of 634m, making it the **world's highest** stand-alone communication tower, Tokyo Skytree is a major symbol of Tokyo. The 350m and 450m high observatory deck offers a **panoramic view** of the entire city and on a sunny day, the Mt. Fuji is also visible from the observatory.

Simply visiting the observatory is already fascinating but add a little more **adventure** and **knowledge** to the experience.

Join the **Skytree Secret Tour** to reveal the secret of the Skytree. The highlight of the tour is the special entrance to the **OFF LIMITS** zone, "Nishikanae".

Why was it built in the place it stands? How did they manage to construct it? How is it strongly related to Japanese temple design?

The tour guided by a **private professional staff** will give answers to all the question you have.
